

Khriji Mohamed Ahmed

B2B SaaS Product Manager

Ariana, Tunis | khrijimohamedahmed@gmail.com | +216-54-651-449 | linkedin.com/in/KhrijiMohamedAhmed | github.com/mohamedahmedkhriji

Summary

Product manager who took a B2B SaaS platform from first commit to live production solo in under 3 months, signing 3 gym partnerships and sustaining 68% user retention at 60 days with zero marketing spend. Founded and ran a 6-person software delivery studio while completing a software engineering degree, cutting client cycle time from 10 to 7 weeks and lifting on-time delivery from 60% to 80% across 10+ B2B accounts in 6 countries. Codes directly in React, Node.js, Flutter, and Laravel, enabling hands-on collaboration with engineering teams without a hand-off layer.

Experience

Founder and Product Manager, Repset

Apr 2026 – Present | Tunis, Tunisia

repset.org | *Live B2B SaaS platform for gym management and member scheduling*

- Identified an underserved gap in affordable, all-in-one gym management tooling; scoped an MVP to session booking, membership tracking, and coach scheduling, deliberately deprioritizing analytics to ship 2+ weeks earlier based on gym-partner feedback.
- Built and deployed the full platform solo (React, Node.js, SQL, Firebase) with a CI/CD pipeline on DigitalOcean covering testing, staging, and production, going from first commit to live production in under 3 months.
- Signed 3 gym partnerships and grew to 50+ active users within 3 months of launch through direct outreach and zero marketing spend, sustaining 68% user retention at 60 days and validating B2B distribution in a new vertical from scratch.
- Compressed the feedback-to-ship cycle to under 2 weeks per iteration by owning the full product loop: gym-partner interviews, backlog prioritization, feature definition, build, and release.

IT Project Manager and CEO, Madinah Innovators

Jun 2024 – Mar 2026 | Tunis, Tunisia

- Founded Madinah Innovators from scratch, handling company registration, tax compliance, and hiring, and built a 6-person software delivery studio while directing all client engagements from day one.
- Lifted on-time delivery from 60% to 80% across 3 to 5 concurrent projects by introducing standardized sprint cadences, shared CI/CD pipelines, and a real-time risk-tracking dashboard visible to all stakeholders, with no headcount increase.
- Cut average kickoff-to-release cycle time from 10 to 7 weeks across web, mobile, and automation projects (React, Laravel, Flutter) through structured sprint planning and retrospectives.
- Translated ambiguous requirements into scoped, prioritized delivery plans for 10+ B2B accounts across Tunisia, UAE, Qatar, Netherlands, Germany, and France, running client discovery from initial brief through final handover.
- Identified recurring manual-process gaps across client accounts and shipped Make/n8n automation workflows to close them, removing manual effort without expanding engineering headcount.

Software Engineer Intern, ZEENOV

Feb 2023 – Jul 2023 | Tunis, Tunisia

- Built and shipped Clevory, a cross-platform e-learning app for university and corporate training (Flutter, Dart, Firebase), owning core content delivery and user authentication flows from spec to production release.
- Identified and resolved a content-loading bottleneck through targeted profiling and refactoring, improving app responsiveness on low-end devices, flagged during code review and shipped within the same sprint.

Education

Software Engineering, TEK-UP Private University

2022 – 2025

Applied Licence, Industrial Electricity, Higher Institute of Technologies of Gabes

2017 – 2021

Skills

Product and delivery: Agile / Scrum, sprint planning, backlog grooming, retrospectives, risk tracking, stakeholder reporting, roadmap ownership, B2B client management

Technical: React, Node.js, Laravel, Flutter, Dart, Firebase, SQL, CI/CD, DigitalOcean, cross-platform mobile and web

Automation: Make, n8n, workflow design and delivery for client operational processes

Tools: Jira, Trello, Clockify, Microsoft 365, Git / GitHub

Operations: Company founding, government registration, tax compliance, hiring, 6-person team management

Languages

Arabic, Native | **French**, Advanced | **English**, Advanced
